

# 17- and 22-Panel Urine Cups

## Large-Panel Urine Cups Streamline Your Drug Testing Program

Some drug tests only need to identify a few drugs. However, as new drugs continue to come on the scene and rise in popularity, many organizations are looking for a larger panel that can identify a wider range of substances. For those use cases, Premier Biotech has created 17- and 22-panel urine testing configurations for fast, accurate, comprehensive testing.

### Comprehensive and Efficient

A single test to screen for our most frequently requested drugs, including fentanyl, gabapentin, xylazine, ketamine, kratom, and K2/K3

### Fast Results

Results available in as little 30 seconds and stable for up to 60 minutes

### Trusted Results

Low cutoffs and highly accurate, sensitive, and specific results for a wide variety of drugs

### Secure Sample

Lid-locking mechanism to prevent leaking and protect specimen integrity during transport

### Single Collection

Send original sample with inconclusive results directly to lab for confirmation

### Backed by Our Own Accredited Lab

Confirmation testing is completed quickly at our in-house CAP Forensic Drug Testing lab

## Large Panels for Wide-Ranging Applications

Our large-panel cups were developed to include our most frequently requested drugs, including fentanyl, THC, opioids, and more. The full configurations include:

- **17-Panel Urine Cup (Forensic Use Only)** for AMP, OPI, BZO, BAR, COC, PCP, MET, THC, MDMA, MTD, TML, K2, BUP, ETG, FYL, K3, OXY + (OXI/SG/pH) / (NIT/GLU/CRE)
- **22-Panel Urine Cup (Forensic Use Only)** for AMP, OPI, BZO, BAR, COC, PCP, KET, 6-MAM, MET, THC, MDMA, MTD, TML, K2, BUP, ETG, FYL, GAB, K3, KRA, OXY, XYL, + (OXI/SG/pH)/(NIT/GLU/CRE)

**Premier Biotech also offers a wide range of products and services including other urine test configurations, oral fluid drug tests, and harm reduction solutions. Reach out to discuss the best options for you.**
