

Follow the leader in oral fluid drug testing

## INTERCEPT *i2he*<sup>®</sup> Oral Fluid Collection Device

As the leader in oral fluid drug testing solutions, we proudly present our latest advancement in oral fluid collection with the Intercept *i2he*<sup>®</sup> Oral Fluid Collection Device.

### Now collections made even easier –

#### COLLECTION WITH CONFIDENCE

- Volume adequacy indicator
- Increased precision of collected sample volumes
- Robust collection pad design safeguards against collection pad failures

#### COLLECTION WITH EASE AND CONVENIENCE

- 3-minute collection time (average) with our proprietary pad
- No pre-collection sample pooling required
- Ergonomic collector design for comfortable end-user experience

#### COLLECTION WITH SUPERIOR PERFORMANCE

- Preserved oral fluid samples are stable up to 21 days post-collection
- Provides consistent drug recovery
- Sample volume collected allows for larger drug panels (1 mL oral fluid and 2 mL buffer solution = 3 mL total sample)
- Compatible with Thermo Fisher oral fluid immunoassays

# From the Leaders in Oral Fluid Drug Testing

Premier Biotech is at the forefront of the oral fluid drug testing industry, offering a variety of innovative lab-based and rapid tests as well as proprietary technology integrations and gold-standard lab services.

## ADVANTAGES OF ORAL FLUID COLLECTION ARE WELL KNOWN AND INCLUDE:

- Non-invasive collection – test anytime, anywhere
- Directly observed, no gender-specific personnel or special equipment required
- Eliminates dilution, substitution, and adulteration tactics
- Established forensic defensibility
- Scientifically-proven technology captured in hundreds of peer-reviewed publications
- Scientific reliability demonstrated by SAMHSA/HHS oral fluid testing guidelines

## BROAD RANGE OF ORAL FLUID TESTING APPLICATIONS:

- Forensic testing
- Criminal justice and drug treatment
- Laboratory-developed testing
- And more

## 3 Easy Steps

- Intercept *i2he*® device collects 90% of specimens in 5 minutes or less, providing greater workflow efficiencies compared to other devices
